

Win-Win Relationships

At Erhardt Holt LLC our number one core value is *Win-Win Relationships*.

In 2020, we introduced our *Business Portal* and *E-Learning Platform* to help our clients simplify recordkeeping and team member training.

Through *Risk Management University*, we utilize technology to simplify OSHA compliance.

In 2020, we moved our in-person OSHA Compliance training to an *E-Learning Platform*. With the “click” of a mouse our clients can implement, manage, and record their OSHA and State compliance training in one paperless system.

Through *Risk Management University*, we take the following steps to implement our recordkeeping and team member training through our *Business Portal* and *E-Learning Platform*:

1. Business Portal
 - i. Electronic OSHA Log
 - ii. We maintain the OSHA log for each work-related injury
 - iii. We produce the 300A annually for our clients
 - iv. Our clients can access all records
2. E-Learning Platform
 - i. All classes designed and tailored to our clients operations
 - ii. Classes can be taken on a cell phone, tablet, laptop, or computer
 - iii. System records all participants progress
 - iv. Manage the entire program with the “click” of a mouse

Our *Business Portal* and *E-Learning Platform* allows our clients to implement OSHA compliance with the “click” of a mouse. We take on the burden of designing, tailoring, recording, and uploading the OSHA classes to the *E-Learning Platform* saving our clients time and money. As part of the *Workers Compensation Claim Management Plan*, we record each work-related injury in the OSHA log.

Working together to implement our OSHA compliance tools has resulted in our client’s insurance rates being 18% to 23% lower than the industry average allowing our clients to retain more of their profit.
