

Win-Win Relationships

At Erhardt Holt LLC our number one core value is *Win-Win Relationships*.

An example of that happened in 2020 for two of our clients that have locations in California.

In December of 2020, the State of California established a new Cal-OSHA requirement called the COVID-19 Prevention Plan.

As part of our Compliance Course, we provide timely updates on any changes in the Federal or State OSHA standards. When California issued the new Cal-OSHA standard we updated our clients of the changes and as the requirements were announced we took the following steps:

1. We reviewed the Cal-OSHA standard and protocols
2. We designed and created the Cal-OSHA written standard for each client
3. We reviewed the protocols and highlighted the new requirements enabling us to create a compliant program
4. We coordinated communication with the Local Office for the Department of Health once the plan was completed

Through [Risk Management University](#) our client was able to stay up to date on the changes with Cal-OSHA and address the new requirements of the COVID-19 Prevention Plan, while staying focused on their daily operations, and growth.

When we help our clients *Win*, we Win, and together our organizations can thrive.
